## HOLIDAY HOUSES

FEBRUARY 21, 2015 IN PROPERTY, ACCOMODATION VICTORIA

I have always dreamed of having a holiday home.. but my husband has no interest at all. His theory is, why go to the same place all the time when we can rent a house whenever we want and we don't have to maintain it? This post is going to be me proving his theory to be spot on.. which I generally do not like to do!

If you are very lucky to have a bigger budget than I do for a mini-break, you absolutely have to visit the most amazing property I have ever seen... EVER. The Ocean House designed by Australian architect Rob Mills. This incredible house is on the Great Ocean Road and has breathtaking views from every single aspect of the property.. I get chills of excitement just thinking about it!

Polished concrete, timber and glass are the three main featured materials in this minimal design with abstract artworks that were personally selected by the architect.

The pictures will say it all from here..
